PROFESSIONAL SUMMARY

Enthusiastic and hardworking Computer Science student with a passion for software development, web technologies, and AI-based solutions. Experienced in building academic and personal projects using modern tools and technologies, with strong problem-solving, analytical, and teamwork skills. Eager to contribute to innovative projects while continuously learning and growing in the tech field.

TECHNICAL SKILLS

- Programming Languages: Python, C++, SQL
- Machine Learning: Supervised Learning, Unsupervised Learning, Classification, Regression, Clustering.
- Libraries & Frameworks: Pandas, NumPy, Scikit-learn, PyTorch.
- Tools & Platforms: Git, GitHub, AWS, Power BI.
- Databases: MySQL, MongoDB.

PROFESSIONAL EXPERIENCE

Ui Ux Intern

May 2025 - July 2025

- I worked as a UI/UX intern with an interest in user-centered design.
- I was responsible for wireframing and prototyping.
- I focused on creating clean and engaging interfaces.
- I demonstrated a quick learning ability, creativity, attention to detail, and a passion for improving digital user experiences

EDUCATION

SRM UNIVERSITY , KTR CAMPUS, CHENNAI

Bachelor of Technology in Computer Science Engineering(CSE) CGPA:- 8.45

ST.MARKS MATRICULATION HIGHER SECONDARY SCHOOL , CHENNAI

CLASS XII Percentage:- 75%

ST.MARKS MATRICULATION HIGHER SECONDARY SCHOOL , CHENNAI

CLASS X Percentage:- 100%

PROJECTS

NeuroSy-RAG: Hybrid Neuro-Symbolic Healthcare Platform

Jan 2026 – Mar 2026

- Engineered a hybrid Neuro-Symbolic diagnostic pipeline using RAG.
- Developed a deterministic rule-based validation engine with Random Forest and Decision Tree classifiers to mitigate hallucinations and ensure clinical reliability.
- Implemented an NLP-driven entity extraction system to transform unstructured patient inputs into structured symptoms mapped against verified medical knowledge bases.
- Integrated Geospatial APIs with weighted performance metrics to rank healthcare providers, bridging the gap between digital diagnosis and physical clinical intervention.

Resume Scanner Segregator

June 2025 – Aug 2025

- Developed an AI-based recruitment system to automate resume parsing and candidate shortlisting.
- Extracted candidate information and skills from PDF/DOCX resumes using NLP techniques.
- Segregated applicants into High, Medium, and Low priority categories based on match scores.
- Built REST APIs with Flask and an interactive React dashboard for recruiters.
- Improved recruitment efficiency by reducing manual resume screening and enabling faster decision-making.

CERTIFICATIONS

- Machine Learning (NPTEL)
- UI/UX
- Networking Basics Cisco
- PYTHON 300+ Exercises(Simple, Intermediate & Complex) - Udemy
